

Remote Management for Power Generation.

Make sure your generator is ready to start if needed.
Make sure your panels are connected.
Whatever equipment you use to generate power,
Netbiter Argos lets you manage it remotely 24/7/365

Netbiter Argos for PowerGen

Monitor all equipment on-site

Quick commissioning

- Full awareness about genset status after just 15 minutes of configuration:
 - Is the backup generator in auto mode?
 - Did any genset fail to start when needed?
 - What is the status of the battery?
 - Do I need to refill the fuel tank?
- Wizard-based configuration for Control Panels, UPS, transfer switches, sensors etc.
- Proven with industry-leading genset control panels
- Library of pre-configured dashboards, alarms, and reports

Complete management solution

- Built-in GPS provides positioning, tracking and geofencing, suitable for mobile equipment.
- Netbiter tank sensor for fuel level monitoring and theft detection
- Device management for inventory and updates
- Easy access to live and historical data

Centralized asset views

- View and monitor all your gensets in a single centralized dashboard with key genset parameters
- Map view provides online/offline status and alarm conditions

Automatic reports

- Selected parameters presented as PDF or Excel
- Schedule reports weekly or monthly
- Automatically email them to any address

Secure

- Two-factor authentication
- TLS (SSL) data encryption
- Hosted on Amazon Web Services (ISO27001 SOC1/SSAE16/ISA E 3402, SOC2)
- WAN/LAN Separation on gateway
- Security Monitored - 24/7/365

Trending of critical generator system data

- Oil pressure and temperature
- Coolant temperature
- Fuel Level and consumption for any size or configuration of tanks

Battery status

- Capacity and charging
- Voltage and Current

Generator Controls

- Running status
- Operating mode
- Alternator frequency and Voltage

ATS (Automatic Transfer Switch)

- Load transfer and Distribution
- Synchronization and paralleling

Edge Gateway

The Ewon Netbiter, installed to your genset system, will connect to Argos and provide immediate access to all functions of your genset control panel, as well as any additional equipment on site.

Did you know?

The Ewon Netbiter is equipped to withstand a severe voltage drop during cold-cracking.

Remote Management

- Proactive maintenance for reduced costs
- Integral monitoring of hybrid power plants
- Detect and prevent fuel theft
- Consolidated view of all installations

Vendor Independent Solution

Gather data in ONE place, no matter which brand!

— Monitor one
of your generators for a specific site

— Monitor some
of your generators regardless of the brand

— Monitor all
generators regardless of the brand

Proven with:

Argos for PowerGen

Argos	Netbiter EC360
 • Web-based user interface • Monitor and control equipment • Wizards, tools and editors	 • Ethernet • 4G, 3G or GSM/GPRS • GPS
